Champions

Action Agenda is mobilizing business action across all 6 axes

Axis 1 | Transitioning Energy, Industry, and Transport

Reduce energy costs and fossil fuel dependence while strengthening your competitive position through:

Call-to-action

Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 1 of the Global Climate Action Agenda

Shifting to fully efficient, fully electrified operations and expanding reliable and affordable clean energy access across your markets & supply chains

Adopting zero-carbon transport, including road transport, aviation, shipping.

Advance zero-carbon heavy manufacturing, including concrete & cement, steel, aluminium, and chemicals.

Executing a phased transition away from fossil fuels across your operations and value chains

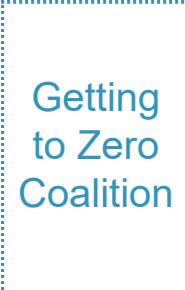

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Axis 1 | Overview of Related Initiatives (1/2)

Non-exhaustive

Initiative	Description	Initiative	Description	Initiative	Description
	Utilities for Net Zero Alliance (UNEZA) is a global coalition of over 70 major power and energy companies dedicated to scaling renewables and modernizing grid infrastructure towards a \$1 trillion project pipeline by 2030		Concrete Zero is a global network of businesses dedicated to net zero concrete, with each business committed to 30% low emission concrete by 2025 and 50% by 2030.		Public-private coalition of 100+ companies using purchasing commitments and 15 governments creating credible demand signals to scale near-zero technologies across hard-to-abate sectors responsible for ~30% of global emissions.
	The Powering Past Coal Alliance (PPCA) is the world's leading coalition of governments and businesses working to accelerate global coal phase out.		EV100 is global network of businesses leading the transition to zero-emission road transport through electrifying their corporate fleets and investing in EV infrastructure.		Alliance of +200 organizations within the maritime, energy, infrastructure, and finance sectors committed to getting commercially viable zero-emission vessels powered by zero-emission fuels into operation by 2030
	EP100 is a global corporate energy efficiency initiative with 125 ambitious businesses committed to doubling their energy productivity, rolling out energy management systems, and/or achieving net zero carbon buildings.		SteelZero brings together leading organizations to speed up the transition to a net zero steel industry by committing to buy and use 100% net zero steel by 2050, at the latest.		Global alliance representing the renewable energy sector and working with governments, businesses, and international institutions to triple renewable energy capacity and double energy efficiency by 2030.
	RE100 is a coalition of over 440 global companies- including Walmart, Apple, and Samsung, representing a combined electricity demand larger than that of Germany, shifting operations to 100% renewables by 2030.		The Sustainable Freight Buyers Alliance (SFBA) is a collaborative initiative that brings together freight buyers in a joint effort to shift towards zero-emissions freight transport.		Zero-Emission Vehicles – Emerging Market is a public-private initiative to elevate cooperation between businesses and governments in emerging markets and developing economies, accelerating the transition to zero-emission vehicles where adoption has lagged most behind.
	WorldGBC is the largest network - including 85 Green Building Councils and industry partners to decarbonise built environments, achieve healthy, equitable, resilient, and circular buildings, cities and communities, and regenerate natural systems.		Emissions Reduction Accelerator (ERA) is a platform uniting value chain actors to move companies from climate ambition to measurable emissions reductions, while unlocking operational efficiency, resilience, and business value.		

Axis 1 | Overview of Related Initiatives (2/2)

Non-exhaustive

Initiative	Description	Initiative	Description	Initiative	Description
	Founding members include PepsiCo, Meta, eBay, REI Co-op, and Green Worldwide Shipping, who are interested in advancing decarbonization within the heavy-duty road transportation sector		The Industry Transition Accelerator (ITA) Fast-tracks decarbonisation in energy-intensive industry and transport sectors by bringing together global leaders from across industry, energy, financial institutions, and governments to unlock investment at scale to speed up the use of decarbonisation solutions.		A first-of-its-kind buyers group within the maritime sector to accelerate commercial deployment of clean energy shipping solutions.
	World's sole active Green Market Maker, accelerating the shift to clean commodities by helping create liquid markets for low-carbon products across various sectors; establishes global networks, engages decision-makers, and forges key partnerships with international institutions, companies, and philanthropies; conducts practice-oriented research to inform the public on relevant clean market developments		Aims to facilitate dialogue on industry level and increase cooperation to help companies to develop solid decarbonization strategies and implementation plans commitments		
			Alliance that accelerates the path to net-zero aviation by driving investment in high-integrity SAF and supporting companies, airlines and freight customers in achieving their climate goals		

Axis 2 | Stewarding Forests, Oceans, and Biodiversity

Reduce negative impact on nature and reduce exposure to nature-related risks while unlocking long-term value from Nature based Solutions through:

Call-to-action

Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 2 of the Global Climate Action Agenda

Investing in nature-based solutions to protect forests and restore natural ecosystems

Assessing and disclosing nature-related risks across your operations and execute credible, science-based strategies for nature restoration

Deploying capital into blue economy solutions, including coastal restoration, sustainable aquaculture and ocean-based renewables

Mangrove Breakthrough

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Axis 2 | Overview of Related Initiatives (1/2)

Non-exhaustive

Initiative	Description	Initiative	Description	Initiative	Description
	Platform to supporting key maritime industries and engaging companies across supply chains; By identifying concrete actions, building effective partnerships, and anticipating systemic shifts shaping the future of the ocean economy, it helps companies and investors to move from isolated initiatives to future-proof approaches at scale		Finance for Biodiversity Foundation is an independent non-profit organisation established in 2021, uniting 200+ global financial institutions as signatories of the FfB Pledge. The Foundation plays a critical role in supporting financial institutions to act on nature loss and drive positive impact as well as advocating for world leaders to take decisive action to halt and reverse biodiversity loss this decade.		Global investor-led engagement initiative focused on supporting greater corporate ambition and action to reverse nature and biodiversity loss; Investors participating in the initiative engage companies in key sectors deemed systemically important in reversing nature and biodiversity loss by 2030
	Global coalition of over 100 influential partner organizations; It has a network of 1500+ companies through the Nature is Everyone's Business Call to Action and a group of 20+ leading business advisors, demonstrating both business leadership and momentum in our engagement with governments around the world		The Ocean Breakthroughs are a set of five science-based sectoral tipping points that show how working with the ocean can cut emissions, build resilience, and secure a safer future for people and planet.		Africa's leading catalyst of ocean-impact entrepreneurship, OceanHub Africa supports, connects, and invests in the entrepreneurs, ventures, and communities making a positive impact on the ocean.
	Platform developed by Capital for Climate in collaboration with the High-Level Champions and Race to Zero teams; The platform is designed to enable allocators to see the landscape of climate opportunity in one single place - to inform strategy, navigate, source and execute investments aligned with science-based net zero pathway (\$41.3B of investable pipeline)		LEAF aims to mobilize public and private sector finance at scale to reward forest governments for reducing deforestation, while catalyzing a wider market for high-integrity forest carbon credits. To date it has raised commitments of over \$1 billion and signed agreements with five forests governments.		One of the world's fastest-growing voluntary corporate climate initiatives, trusted by over 11,000 companies and financial institutions worldwide; It develops the standards, tools, and guidance which enable companies and financial institutions worldwide to take credible, science-based climate action.
	Bringing together practical guidance to support financial institutions to eliminate deforestation, conversion, and associated human rights abuses from their portfolios		Global movement and guiding force for systemic change, redefining how mangroves are valued, financed, and embedded into climate and economic agendas; It aims to protect and restore 15M hectares of mangroves by 2030 by mobilizing \$4B in capital		Market-led, science-based and government-backed initiative providing organizations with the tools to act on evolving nature-related issues; Aims to provide decision makers in business and capital markets with better quality information through corporate reporting on nature that improves enterprise and portfolio risk management

Axis 2 | Overview of Related Initiatives (2/2)

Initiative

Description

Forest Investor Club (FIC) a WBCSD-led network of financial institutions, companies and investors committed to deploying capital into the conservation, restoration and sustainable management of forests and nature. It builds investment pipelines, de-risks opportunities and develops solutions to overcome barriers to forest finance at scale.

The Natural Climate Solutions Alliance (NCSA) a business-led alliance mobilizing high-integrity demand for quality natural climate solutions, from forest protection to ecosystem restoration, through voluntary carbon markets, procurement guidance, and policy advocacy to unlock nature's potential to deliver up to 30% of needed emissions reductions by 2030.

Axis 3 | Transforming Agriculture and Food Systems

Build resilient and secure agricultural supply chains through scaling regenerative practices through:

Call-to-action

Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 3 of the Global Climate Action Agenda

Scale regenerative agriculture to increase productivity while reducing emissions	 The Food and Land Use Coalition	 WBC World Business Council for Sustainable Development	Business 4 Land				
Adopt solutions reverse land degradation across agricultural supply chains	 AMBITION LOOP	Business 4 Land		 RIYADH ACTION AGENDA	 RAIZ Resilient Agriculture Investment for net-zero land degradation		
Reduce waste across food systems to improve efficiency and minimize costs	Business 4 Land		 coolfood FOR DELICIOUS CLIMATE ACTION	 RIYADH ACTION AGENDA	T/It Collective	 The Global FoodBanking Network	 WRAP
Reduce methane and fertilizer-related emissions across agricultural value chains	 Environmental Defense Fund			 WBC World Business Council for Sustainable Development			
Align business growth with improved access to affordable food across vulnerable markets and supply chains	 proveg international		 Health-Care Without Harm	 WRAP	 ReFED	 The Global FoodBanking Network	

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Axis 3 | Overview of Related Initiatives (1/2)

Initiative	Description	Initiative	Description	Initiative	Description
	The Action Agenda for Regenerative Landscapes brings together farmers, agribusinesses, financiers, and leading non-state actors to aggregate, amplify and accelerate existing efforts and commitments to transition large agricultural landscapes to regenerative practices by 2030. More than 40 organizations have reported \$9B+ in committed investment, covering more than 210 million hectares of land, reaching 12 million farmers across 90+ commodities and 110+ countries by 2030,	Business 4 Land <i>Champions' Council</i>	Alliance of industry leaders in support of large-scale land restoration; The B4L Champions Council members include ten companies: Nexira, Suzano, Gut & Bösel, Patagonia Provisions/ B.Cameron Consulting, Olam Group, Genesis Soil Health, EY, Envision Energy, Mirova, LVMH		One of the world's top environmental organizations to deliver bold solutions that cut harmful pollution and strengthen the ability of people and nature to thrive. Launched the Dairy Methane Action Alliance (DMAA) at COP 28, to accelerate methane emissions reduction across dairy supply chains. DMAA comprises of 10 leading global food and agriculture companies including Danone, Starbucks, General Mills, etc.
	Global NGO on a mission to lead and inspire coordinated, transformative action on a small number of major challenges across climate change, biodiversity, plastics pollution, land, agriculture & food systems, and water; Collaborates with broad partner ecosystems to create compelling agendas for action		Global Initiative that makes the values of land and its ecosystem services count in decisions by the providing robust economic evidence and supporting its use in land decisions.		Leading community supported agriculture initiative transforming how we produce/consume food and use land for a sustainable future.
Business 4 Land	UNCCD's main initiative to engage the private sector in sustainable land, soil and water management; Aims to restore 1.5B hectares of land by 2030, contributing to Land Degradation Neutrality (LDN), a global commitment to achieve net zero land degradation by 2030		Provides food providers the science, data, and strategies to reduce procurement related GHG emissions, making healthier and sustainable food accessible for everyone; From its open-access tools and research to tailored support through membership programs and services, it has a solution for every organization looking to make a difference		Building on a 20-year partnership between WRI and WBCSD, GHG Protocol works with governments, industry associations, NGOs, businesses and other organizations to establish global standardized frameworks to measure and manage greenhouse gas (GHG) emissions from private and public sector operations, value chains and mitigation actions
			RAIZ acts as an accelerator of current global action on agricultural land restoration by fostering innovation and cooperation in the financial ecosystems through: 1. mapping degraded landscapes to prioritize areas for investment, 2. identify ad cost investable solutions, 3. design co-investment mechanisms to scale financing, and 4. foster collaboration and knowledge exchange within the restoration ecosystem.		Seeks to transform health care worldwide so that it reduces its environmental impact, becomes a community anchor for sustainability, and a leader in the global movement for environmental health and justice; Engages +2000 members of Global Green and Healthy Hospitals network, representing +70,000 hospitals and health centers in 86 countries

Axis 3 | Overview of Related Initiatives (2/2)

Initiative	Description	Initiative	Description	Initiative	Description
	One Planet Business for Biodiversity (OP2B) hosted by the World Business Council for Sustainable Development, and launched at the UN Climate Action summit in 2019, One Planet Business for Biodiversity (OP2B) is a coalition of companies and NGOs seeking to scale up regenerative agricultural practices, boost cultivated biodiversity, and enhance the restoration of high value natural ecosystems.		Pioneering global platform, mobilizing coordinated action between states and non-state actors to restore 1.5 billion hectares of degraded land by 2030. To address barriers, accelerate action, and drive measurable progress, through practical solutions and collaborative partnerships to combat desertification, land degradation and drought		Alliance promote real change in the way that business impact is measured to stimulate action for a sustainable future for everyone; Promoters collaboration with 2,000 of the world's most influential companies;
	Organization that works to accelerate the transition to a sustainable global food system by making plant-rich foods and alternative proteins more accessible and appealing; Engages with all relevant stakeholders to create a world where the food we eat is good for all people, animals, and our planet		Works with partners in over 50 countries to recover and redirect food to those who need it; In 2023, its Network provided food to more than 40 million people, reducing food waste and creating healthy, resilient communities.		Global environmental action NGO transforming food systems to create Circular Living for the benefit of the climate, nature, and people; For over twenty years, WRAP has delivered programs that reduce CO2 and waste, restore nature, and change people's behaviour
	U.S.-based nonprofit working to catalyze the food system toward evidence-based action to stop wasting food; Since its inception, ReFED has worked to bring new philanthropic and investment capital, along with technology, business, and policy innovation, to the food waste challenge		Strengthens food resilience through practical partnerships with farmers, researchers and local organizations; It support efforts that improve access to nutritious, affordable, sustainable food and build on local agricultural knowledge		Non-governmental and non-profit organization that works to change the current path of environmental degradation and promote a future where society and nature live in harmony; Promotes collaboration with different actors: traditional communities, organizations, companies, and government

Axis 4 | Building Resilience for Cities, Infrastructure and Water

Protect assets from physical climate risks while unlocking innovation and growth in adaptation and resilience solutions through:

Call-to-action

Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 4 of the Global Climate Action Agenda

Reduce operational and embodied carbon from buildings by scaling efficient, electrified, and low-carbon construction, and adopt resilient construction standards

Integrate water risk management into operations and supply chains decisions

Redesign production around circularity to cut emissions, and supply risk

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Initiative	Description	Initiative	Description	Initiative	Description
	Latin American philanthropic organization with global reach that generate impact by focusing on three pillars of sustainable development: democratic innovation, climate action and just regenerative economy; Disbursed USD 16.67M in 625 social investments in 2024 to partner organizations in 36 countries		Works with partners in over 50 countries to recover and redirect food to those who need it; In 2023, its Network provided food to more than 40 million people, reducing food waste and creating healthy, resilient communities.		Global environmental action NGO transforming food systems to create Circular Living for the benefit of the climate, nature, and people; For over twenty years, WRAP has delivered programs that reduce CO2 and waste, restore nature, and change people's behaviour
	The World Green Building Council (WorldGBC) is the largest local-regional-global action network leading the transformation to sustainable and decarbonised built environments. Together, with over 85 Green Building Councils and industry partners from all around the world, we are driving systemic changes to achieve, total decarbonisation of the built environment, healthy, equitable and resilient buildings, cities and communities and regeneration of natural systems and a thriving circular economy		The Climate and Clean Air Coalition (CCAC) is a voluntary partnership founded in 2012, hosted by <u>UNEP</u> . It brings together over 190 governments and organizations to reduce short-lived climate pollutants (SLCPs) like methane, black carbon, and HFCs, with a goal of curbing climate change and saving lives through cleaner air.		Non-governmental and non-profit organization that works to change the current path of environmental degradation and promote a future where society and nature live in harmony; Promotes collaboration with different actors: traditional communities, organizations, companies, and government
	U.S.-based nonprofit working to catalyze the food system toward evidence-based action to stop wasting food; Since its inception, ReFED has worked to bring new philanthropic and investment capital, along with technology, business, and policy innovation, to the food waste challenge		UNEP FI brings together a network of more than 550 banks, insurers and investors that catalyzes action across the financial system to deliver more sustainable global economies; For 30+ years the initiative has been connecting the UN with financial institutions from around the world to shape the sustainable finance agenda and build the world's foremost sustainability frameworks for banks and insurers.		Founded in 2019 to accelerate the planning, design, construction and operation of safe, sustainable, and resilient infrastructure, ICSI brings together a network of engineers to act on sustainability, resilience, and climate change impacts on infrastructure and the communities they serve.
					The Climate-Resilient Housing Initiative, powered by Build Change, is at the forefront of global efforts to embed resilience into the housing sector. We engage decision-makers and homeowners across the housing value chain and bring together governments, financial institutions, philanthropists, and innovators to ensure that climate-resilient housing is accessible to all.

Axis 4 | Overview of Related Initiatives (2/2)

Initiative

Description

Built Environment Market Transformation Action Agenda brings together stakeholders from all along the value chain to identify the key barriers preventing us from achieving a net zero built environment.

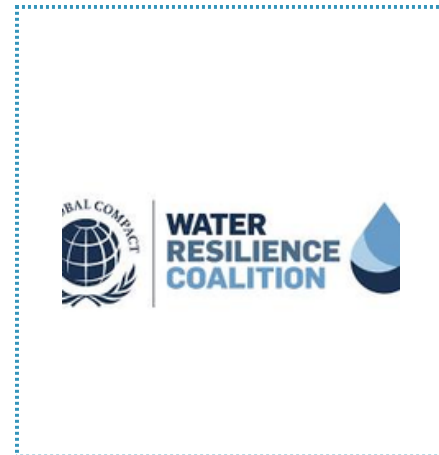

Global Circularity Protocol for business (GCP) is the world's first voluntary science-based framework for circularity, launched by WBCSD and UNEP at COP30. It helps companies of all sizes measure, manage and communicate circular performance across value chains - with potential to avoid 76 gigatons of CO₂e and save 120 billion tonnes of materials by 2050.

Initiative

Description

The Alliance for Water Stewardship (AWS) is a global, multi-stakeholder membership organization dedicated to promoting responsible freshwater management through a credible, voluntary certification standard.

Launched in 2020, the WRC is a CEO-led, industry-driven initiative of the UN Global Compact CEO Water Mandate committed to accelerating progress against the global water crisis. WRC has a collective goal to positively impact over 100 water-stressed basins globally and to enable equitable access and sanitation to over 100 million people.

Axis 5 | Fostering Human and Social Development

Strengthen social license to operate and build a future-ready workforce for a just transition through:

Call-to-action

Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 5 of the Global Climate Action Agenda

Increase people resilience, reducing vulnerability

Scale green skills & workforce reskilling to enable a just & competitive transition

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Initiative	Description	Initiative	Description	Initiative	Description
	International organization dedicated to breaking barriers and building pathways for young people to develop skills for confidently engaging and making an impact in climate policy spaces; Since 2014, it has trained +10,000 young people to confidently engage in climate policy spaces and access their right to hold leaders accountable to a climate just future		Devoted to promoting social justice and internationally recognized human and labor rights, pursuing its founding mission that social justice is essential to universal and lasting peace; It brings together governments, employers and workers of 187 Member States, to set labor standards, develop policies and devise programmes promoting decent work for all women and men		Program that promotes cleantech innovation and entrepreneurship to address urgent environmental challenges; It brings transformative change through 2 main interventions: (1) direct support to emerging SMEs offering innovative cleantech solutions and (2) development and strengthening of cleantech innovation and entrepreneurship ecosystems (CIEEs)
	Global non-profit equipping the creative ecosystem to preserve truth and accelerate systemic change; now a UN-recognized movement of +6,000 professionals across +90 countries, the organization leads an alliance of agencies adopting fossil-free and anti-greenwashing standards, and advances the serviced emissions framework with Oxford Net Zero		Lead global intergovernmental agency for energy transformation that serves as the principal platform for international cooperation, supports countries in their energy transitions, and provides state of the art data and analyses on technology, innovation, policy, finance and investment		Launched in 2020, the WRC is a CEO-led, industry-driven initiative of the UN Global Compact CEO Water Mandate committed to accelerating progress against the global water crisis. WRC has a collective goal to positively impact over 100 water-stressed basins globally and to enable equitable access and sanitation to over 100 million people.
	Global, multi-stakeholder coalition – hosted by UNIDO and jointly co-led by ENERGIA, GWNET, and SEforALL –that joins forces to catalyze action towards gender equality and women's empowerment to accelerate a just, inclusive and sustainable energy transition. With over 120 members including public and private sector, civil society, academia and youth-led groups.		Global youth-led organization empowering and educating young people (18 to 30) to accelerate the sustainable energy transition through a variety of initiatives, including university-based Chapters, a digital Energy System Map, and the largest student-led energy conference in the world. It works with a network of 50,000 young people from over 120 countries to build the knowledge, skills, and networks they need to take action on energy.		Hosted by the World Business Council for Sustainable Development, and launched at the UN Climate Action summit in 2019, One Planet Business for Biodiversity (OP2B) is a coalition of companies and NGOs seeking to scale up regenerative agricultural practices, boost cultivated biodiversity, and enhance the restoration of high value natural ecosystems.
					<u>Initiative 20x20</u> seeks to change the dynamics of land degradation in Latin America and the Caribbean. Their aim is to protect and restore 50 million hectares of forests, farms, pasture and other landscapes by 2030.

Axis 6 | Cross - Unleashing Enablers and Accelerators, including on Finance, Technology & Capacity Building

Unlock capital, innovation, and competitive advantage through climate-aligned finance and technology through:

 Call-to-action	 Take action, scale solutions, and partner with stakeholders through high-ambition peer initiatives and coalitions in Axis 6 of the Global Climate Action Agenda
<p>Enable capital allocation and incentives to accelerate net-zero, adaptation and nature-positive outcomes</p>	       
<p>Standardize measurement and disclosure to build credible transition plans</p>	     
<p>Scale AI, digital MRV and data systems to enhance transparency and climate risk management</p>	 
<p>Accelerate innovation through partnerships with SMEs and climate tech leaders</p>	    
<p>Mobilize investment in bioeconomy and biotechnology to unlock low-carbon value chains and diversified growth</p>	    

1. This vision is not exhaustive; it provides relevant examples of how businesses can connect to specific themes/calls to action through initiatives.

Axis 6 | Overview of Related Initiatives (1/2)
